

TROVE Denmark & Germany

Field & Discovery KnowledgeBase

<https://www.marinerregions.org/eezdetails.php?mrgid=5669>

TROVE Denmark & Germany contains data and information on 145 Fields and Discoveries from the German and Danish sectors of the North Sea and Baltic Sea.

Includes:

- Field and Discovery wide summarised data for geological and operational parameters including reservoir properties, fluid properties and well & infrastructure details
- Additional information for each asset including cross-sections, well logs and structure maps
- Audit trail for every data point captured within the datatables

TROVE Denmark & Germany provides:

- Analogue information from every offshore field & discovery
- Ability to compare proprietary data to public domain data easily with built in functionality
- Built in dashboards providing rapid filtering and analysis of data
