

TROVE Latin America North

Field & Discovery KnowledgeBase

USGS (2020). [online] Available at: <https://ngmdb.usgs.gov/topoview/viewer/#6/5.970/-58.788>

TROVE Latin America North contains regional, field and discovery data for Trinidad & Tobago, Guyana, Suriname and French Guiana.

Includes:

- Unstructured data on every field and discovery including maps, seismic lines, well logs, infrastructure details
- Detailed structured data on over 200 fields & discoveries
- Information on reservoir characteristics, fluid characteristics, volumetrics, reservoir depths and more
- Audit trail allowing sense checking of any datapoint
- Rapid filtering and analysis tools

TROVE Latin America North provides:

- A technical analogue database
- Regional understanding including geology, infrastructure and operating companies
- Rapid asset comparison

Asset	Depth (m)	Age	Reservoirs (no. - Average)	Start-up date	Block
Liza	1183	Cretaceous	1.00	2010	Statank
Chaconia	100	Tertiary	0.00	2003	ACOR-1
Angostura	41	Tertiary	0.20	2020	Statank
Liza Deep	2833	Cretaceous	0.96	2004	Statank-1
Poinsettia	100	Tertiary	0.96	2004	Statank
Payara	2020	Cretaceous	1.00	2023	Statank
